MYCENTER[®] 3XVT 5-Axis Vertical Machining Center

We've made complex parts machining more affordable than ever. This 5-axis trunnion machining center is designed & built using Kitamura's proven trunnion technology. It delivers the accuracy, performance and reliability to meet today's growing demand for complex components processing. The generous work envelope houses a rigid factory installed tilting trunnion table and powerful 41HP spindle that stand up to rigorous cuts in today's tough materials.

Check out these value-driven performance features:

- Built-In 4th/5th Axis Trunnion Table
- Powerful, High Speed, 41HP 15,000 min-1 Dual Contact Spindle
- Class-Leading High Capacity 40 Tool ATC, #40
- IAC System 1 Thermal Compensation System
- Feature-Rich and Powerful *Arumatik Mi Pro* Controller

The high-performance ATC holds **40 tools** and provides "operator-friendly" accessibility for easy tool loading.

Machine multiple surfaces in one set-up with the Mycenter-3XVT's 5-axis machining capability. Easy and expansive table access streamline and simplify workpiece loading and unloading for larger diameter parts at the same time offering flexibility in fixture set-up for smaller part processing.

The integrated trunnion table offers the rigidity, accuracy and stability needed to productively machine complex part geometries. For those accustomed to 3-axis machining, the built-in table design of the tilting trunnion allows for high tech, high precision parts to be machined simpler and easier with less handling.

Arumatik-Mi Pro CNC Controller

The Mycenter-3XVT is equipped with the latest, state-of-the-art Kitamura Arumatik®-Mi Pro CNC Controller. Feature packed with high speed machining functions second to none, the Arumatik®-Mi Pro offers up to 16x faster processing speeds when compared to today's conventional controls.
